- Adobe Suite: Illustrator, Photoshop, and InDesign
- Programming in Python, CSS, HTML
- Mapbox Platform
- CARTO Platform

## SUMMARY

I am currently immersed in my senior year at the University of Wisconsin-Madison studying Geographic Information Systems and Cartography with a keen interest in Urban Planning and a focus on the application of emerging technologies and data analysis in the design, planning, and mapping of our cities. I have recently returned from studying abroad in Europe and after visiting Copenhagen, Barcelona, Berlin, Budapest, Rome, Venice, and Bologna I feel I have broadened my perspective on how cities should be planned to be people-oriented and best optimized for the 21st century.
